

Guide

General

Keyboard Shortcuts

The following shortcuts are available anywhere within the main docset search and browse view.

Combination	Description
Win + Ctrl + V	Version 1.1.3 and later: When Velocity is running, brings the Window to the front with the cursor in the search docsets box.
Ctrl + E	Move the keyboard focus to the search docsets box.
Ctrl + F	Begins a find in page search.
Alt + ←	Navigate back a page.
Alt + →	Navigate forward a page.
Ctrl + Tab	Switch the keyboard focus between the content/search view and the browser view.
Alt	Hold to reveal the ribbon menu key tips
Win + Ctrl + E	Version 1.1.2 and earlier: When Velocity is running, brings the Window to the front with the cursor in the search docsets box.

Search

Simply start to type what you want to search for and results will appear as you type.

Docset Keyword Filters

To activate a docset filter simply type the keyword followed by a `:` at the start of the text. The keyword will be replaced by the docset filter dropdown and the icon for the active docset will be displayed. This filter can be removed by pressing `backspace` when the cursor is next to the filter.
